## Soroptimist and Leadership

Mentors and professional trainers are soroptimists who offer their expertise for free, because we want to help women grow into strong, independent leaders, whatever their line of work is. We work to increase the presence of women at all decision-making levels of society. You could be one of them!

Soroptimists work together at local, national and international levels to educate, empower and enable women and girls to improve their lives. We are an international network of some 72,000 women, who are powerful and effective advocates of women's and girls' rights.
