

Soroptimists Against Cervical Cancer

Saving Lives in Narok South, Kenya

A Partnership for Community-Led Cervical Cancer Screening & HPV Vaccination Outreach

SOROPTIMIST INTERNATIONAL NAIROBI CENTRAL (SINC) CLUB & NAROK SOUTH CHMT

Strengthening Grassroots Healthcare

Strategic Partnership

Soroptimist International Nairobi Central Club partnered with the Narok South sub-County Health Management Team to activate grassroots health structures across Melelo and Ololunga wards.

By shifting to a **community-led model**, we integrated local ***dialogue advocates*** into the formal sub-county clinical ***support network*** to build trust, dispel myths, and provide sustainable reproductive health pathways.

SOROPTIMISTS AGAINST CERVICAL CANCER:
My Health & My Responsibility
An Initiative of Soroptimist International Club of Nairobi Central

PROJECT GOAL
To Increase Cervical Cancer Awareness & Early Action by Mobilizing Community Dialogue Champions in Narok & Machakos Counties

PROJECT STRATEGIES

- Promote Cervical Cancer Awareness and Education
- Strengthen Community Knowledge & Dialogues
- Promote Screening & Early Detection
- Promote Access to Treatment & Care
- Inclusive Engagement of Youth, Men & Boys as Change Agents
- Data Driven Growth

PARTNERSHIPS & COLLABORATIONS

Our Grassroots Implementation Strategy

50 Champions Trained

Dialogue Champions activated across six community health units **under the support of CSS and nutrition focal points.**

Weekly outreaches

Field teams conducted persistent domestic sensitizations to raise awareness on regular screenings **and vaccine importance.**

Double Protection

Parallel **focus** targeting **adult** cervical cancer diagnostic screenings alongside preventive **HPV** vaccines **for girls below 14.**

Massive Mobilization Achievements

Door to Door & Community Out reaches.

1,589

Women Screened for Cervical Cancer

By utilizing trusted local peer educators, we successfully navigated and broke through deep regional and cultural taboos regarding clinical reproductive health checks.

The 1,589 screenings completed in rural units represent a vital diagnostic baseline, preventing advanced oncological stages through timely identification.

Republic of Kenya

Reduced Stigma and Fear to screening

Republic of Kenya

The 20% Clinical Referral Continuum

The identification of 317 actionable cases indicates exceptional targeted outreach, directly engaging historically underserved, high-risk demographics.

Key Performance Indicators

Intervention Objective	Achieved	Strategic Clinical Impact
Trained Dialogue Champions	50	Active structural community assets reporting to Community Health Units Leads.
CervicalCancer Screenings	1,589	Massive localized diagnostic baseline surge, encouraging early detection.
Primary Prevention (HPV Vaccine)	819	Preventive immunological protection provided for girls under 14 years old.
Clinical Referrals Initiated	317	Robust care pipeline established to secure medical follow-up for risk cases.

Sustainability Tracking Roadmap

Referral Loop

Dialogue field systematically verify clinical visits and diagnostic resolutions for all 317 referred women.

Vaccination Tracking

Logistics setup to ensure all 819 primary vaccine recipients receive their critical subsequent HPV immunizations.

Supply Chain

Lobby the regional sub-county CHMT for a steady pipeline of cervical cancer screening reagents (VIA/VILI).
